

Listening to Animals

1. Locate an animal sound (likely a bird, but could be a squirrel, insects, etc...)
2. Listen (carefully, perhaps repeatedly)
3. Try: using a sentence or two, attempt to evoke what sticks out to you about the sound
4. Try: using either the "sketch" method or music notation, attempt to depict this sound visually

Note: #3 and #4 are hard! It's ok to feel a bit unsure as you think about this.

Sound:

Place/time/location:

A couple of sentences of prose about this sound:

Visual representation?
